

AVAILABLE FOR WORK PLACEMENT IN DATA ANALYSIS

Princia RASOLOFOMANANA - 20 years old

Co-op Student: Internal Control Tools and Data Assistant at Renault Group

+33 7 65 88 08 97 | princiarslfm@gmail.com | LinkedIn : [Princia RASOLOFOMANANA](#) | Valenton, France

SKILLS

STATISTICS

- Descriptive & Inferential statistics
- Statistical testing
- Regression models
- PCA/MCA
- Time series analysis

BUSINESS INTELLIGENCE

- Data Structuring and Management
- Data integration, transformation, and ETL processes
- Data warehouse implementation
- Programming and statistical programming
- KPI design and dashboard creation: data visualization and reporting

ECONOMIC & PROFESSIONAL ENVIRONMENT

- Scientific communication
- Report writing: technical and analytical
- GDPR analysis
- Questionnaire development for survey studies
- Internal control principles
- Audit tools

COMPUTER

Software and IT Tools

- Power bi /Power Query
- Visual Studio Code
- Jupyter
- Excel
- Microsoft Project
- Lime Survey
- RStudio
- Spyder
- SAS Studio
- Access
- Microsoft Office Suite
- C

Programming Languages

- R
- SAS
- SQL
- HTML/CSS
- VBA for Excel
- Python
- DAX
- C

LANGUAGES

- Malagasy: Native
- English: B2 | CEFR
- Mandarin Chinese | YCT 1: 178/200
- French: C1 | CEFR
- Spanish: B1 | CEFR

SOFT SKILLS

- Analytical thinking
- Teamwork
- Organizational skills
- Autonomy
- Rigor
- Intellectual curiosity

CERTIFICATIONS

- Anticorruption in Finance | Renault Group
- Antitrust Laws | Renault Group
- AI Act Awareness | Renault Group IS/IT

I'm a Co-op student in the data field, motivated by a structured and rigorous work environment, with a strong desire to learn and grow. I aim to apply my skills to support team activities while expanding my knowledge and continuing to develop professionally in this field.

EDUCATION & DEGREES

2024 - 2027 | BUT Science des Données - VCOD

IUT de Paris Rives-de-Seine - Paris, France

3-year Technological Bachelor's Degree, specializing in Visualization and Conception of Decisional Tools

Work-study program: 2nd and final year as co-op Internal Control Tools and Data Assistant

Frequency: 1 week with the Company and 1 week at school - 35 hours per week

Subjects: Databases, Data Visualization and Reporting, Statistical Programming, Descriptive and Inferential Statistics, Probability, Algebra, Hypothesis Testing, Object-Oriented Programming, Decision Support Systems, Web Technologies, SAS, Economics, Communication, Management, English

2023 - 2024 | Double Licence Maths-Info

CY Cergy Paris Université - Cergy, France

First year of a Dual Bachelor's Degree in Mathematics and Computer Science

Subjects: Mathematics, Physics, Python and C programming, English

June 2023 | Baccalauréat general

Lycée Le Petit Nid - Madagascar

High School Certificate majoring in Mathematics and Economics - obtained with a distinction

WORK EXPERIENCE

2025 - 2027 | Co-op Student in Internal Control Tools and Data

Renault Group - France

I work in Renault Group's Internal Control Methods & Tools Department, where I support the creation of tools and data analyses for self-assessment campaigns. I mainly work with SAP data and the GRC tool (Governance, Risk & Compliance) called Optro, collaborating closely with the Tools & Data Manager. My daily work involves **Power BI, Power Query, Excel and VBA**.

Main Responsibilities

- Build and maintain databases for internal control activities
- Process and analyze SAP data to support assessments
- Create KPIs and dashboards using Power BI
- Automate analyses and data processing with Python
- Use Optro to organize and track risks, controls, and action plans
- Support the preparation of tools and materials for self-assessment campaigns

Projects Personally Developed

November 2025 | IT.01 – Access to High-Risk IT Systems

This project aimed to identify high-risk SAP user profiles, including users with sensitive transactions, segregation-of-duties conflicts, and inactive employees with system access.

- Personal Data Protection (GDPR) | Renault Group
- Living Together & Diversity Awareness | Renault Group
- Initiation to C Programming Language | SoloLearn
- Communicating in a Multicultural Environment | LinkedIn Learning

DATA DOMAINS COVERED

- Survey studies
- Epidemiology
- Retail / consumer markets
- Cinematography
- Energy sector
- Education sector
- Agriculture
- Human Resources (HR)
- SAP environments
- Governance, Risk & Compliance (GRC)

OTHER

Driving License: Malagasy Category B

PERSONAL INTEREST

Dance

I practice **Afro dance, hip-hop, and contemporary dance**. I participated in a televised talent show called *Talentako*, broadcast on a TV channel, as part of a group of three called **Dancing Girl**. We performed Afro and hip-hop dance styles and achieved **first place in the dance category** and third place overall across all categories.

Theatre

I played the role of **Esmeralda** in a creative adaptation inspired by **Notre-Dame de Paris**. We used the song **“Belle”**, composed by Riccardo Cocciante, in a poetic way by reworking the lyrics into a narrative performance.

Sports and Fitness

I have been playing **table tennis** since the age of 16. I particularly enjoy this sport. In addition, I have been going to the **gym** regularly since January to maintain my physical fitness and well-being.

My methodology:

- Extract SAP data and collect the SoD role matrix
- Clean and prepare datasets using Power Query
- Develop a Power BI dashboard (Overview, Role Checks, Transaction Checks)

December 2025 | Company & Location Hierarchy – Delegation of Authority

This project focused on completing Company and Location Hierarchy information for DoA issuers using HR data from Workday.

My methodology:

- Match issuers with the correct HR dataset using reference dates
- Cross-check hierarchy data across multiple Workday files
- Validate and finalize the DoA dataset

ACADEMIC EXPERIENCE

January 2026 | Parisian retailers digitalisation

As a team of two, we carried out a data-enrichment project based on the BDCOM2023 dataset provided by APUR. The goal was to analyse the digital presence of Parisian shops by identifying whether they had a website, offered delivery services, and by adding missing GPS coordinates.

Our methodology:

- **Python (Jupyter Notebook)** for data processing, automation and web-scraping.
- **API requests** to retrieve GPS coordinates via the *API Adresse*.
- **Web automation (Selenium)** to query Google Maps at scale.
- **HTML parsing (BeautifulSoup)** to extract websites and delivery options.
- **Data cleaning & merging (pandas)** to build the final dataset.

December 2025 | Time series analysis of u.s. solar electricity production

As a team of two, we conducted a full time-series analysis of U.S. solar electricity production using data from the U.S. Energy Information Administration (EIA) covering 2001 to 2024. The objective was to study long-term trends, seasonal patterns and to produce forecasts for 2025, while comparing several forecasting methods. The project helped us understand how solar energy has grown over time and how statistical models can predict future production levels.

Our methodology :

- **R language (RStudio)** for all data cleaning, modelling, and visualisation.
- **Time-series decomposition:** trend, seasonality, residuals (moving averages + regression).
- **Statistical forecasting models:** Holt-Winters, Trend + Seasonal coefficients, ARIMA/SARIMA.
- **Forecast validation:** prediction of 2024 using data up to 2023 + MSE comparison.
- **Data visualisation:** interpretation of seasonally adjusted series and residual boxplots.

Portfolio website development

As an individual assignment, I designed and developed a multi-page professional portfolio website to present my skills, experience and academic background. The project focused on building a clean and consistent user interface using only **HTML and CSS**, while applying structuring and organisation principles essential for front-end development.

My methodology

- Construction of **multiple HTML pages** (Home, Skills, Projects, Contact).
- Use of **one single CSS stylesheet** for consistent design across all pages.
- Clean and organised HTML structure to improve readability.
- Simple navigation to help recruiters access key information easily.
